EXPERIENCE

FULL-STACK DEVELOPER

COSMIC SOCIETY (via Penbrothers)

MAR 2026 - PRESENT
BERLIN, GERMANY (REMOTE)

- Build and ship features for **enjoyable**, a multi-brand event and retail-activation platform using **TypeScript**, **Next.js**, **Supabase** and **Tailwind**, deployed on **Netlify**.
- Rebuilt **admin analytics** loyalty statistics with leaderboards and a live activity feed, plus unified dispense reporting across staff, agent and machine channels with date-range filtering and CSV export.
- Fixed two **cross-brand privilege-escalation vulnerabilities** in the Postgres **Row-Level Security** layer.
- Scaled the platform for production event load** by load-profiling the database, rewriting brand-admin RLS policies after a statement-timeout incident, virtualising admin lists, and moving heavy statistics to **Deno Edge Functions**.
- Extended the **Salesforce**, **Twilio** and **Veriff/SCHUFA** integrations added SMS delivery observability with segment-accurate cost tracking, a retry queue for pending consent syncs, and **Apple Wallet** membership passes.
- Maintain **E2E and integration coverage** with **Vitest** and **Puppeteer**; all schema changes ship as repeatable migrations.

FULL STACK DEVELOPER

HEQS GROUP

AUG 2025 - FEB 2026
SYDNEY, AUSTRALIA (REMOTE)

- Built, maintained and optimized production web applications using **Typescript**, **Next.js**, **NestJS** and **Laravel**.
- Migrate legacy Next.js Pages Router to App Router, resulting a **30%+ faster page load** and improved Core Web Vitals.
- Applied technical SEO solutions and dynamic sitemaps that **increased organic page visits by ~2,000+**.
- Reduced cloud costs by ~45%** by implementing CDN-based asset caching, and server-side rendering strategies.
- Automated production build and release workflows** for services hosted on Vercel, Heroku, AWS, and Azure by orchestrating robust CI/CD pipelines using GitHub Actions.

FULL-STACK DEVELOPER

FIVETWENTY I.T. SERVICES

JUN 2024 - JUN 2025
ALABANG, MUNTINLUPA CITY

- Developed and engineered enterprise-grade applications using **Typescript**, **React.js**, **Express.js** and **PostgreSQL** containerized the system using **Docker** and hosted on **DigitalOcean**.
- Pioneered the adoption of **E2E testing** using **Playwright** and **Jest**, reducing regression bugs and ensuring reliability.
- Worked with a team in an **Agile environment**, participating in sprint planning, debugging, QA, and code reviews.
- Assisted with IT troubleshooting (hardware, software, network), reducing downtime for employees.

FREELANCE DEVELOPER

Self-Employed

2023 - 2025

- Designed and developed full-stack web and mobile applications for small businesses and academic clients.
- Built systems using React, Express, **React Native**, **Supabase**, and **PostgreSQL**.
- Secured and optimized client applications, implementing authentication flows and database policies.
- Deployed applications and provided ongoing maintenance, bug fixes, and performance improvements.

TECHNICAL SKILLS

- Languages:** JavaScript (ES6+), TypeScript, Python, HTML5, CSS3, SQL
- Frameworks:** Next.js, React.js, NestJS, Node.js, Express.js, Laravel, FastApi, React Native, TailwindCSS, shadcn/ui
- Cloud & DevOps:** Azure, Vercel, Netlify, Heroku, Docker, DigitalOcean, GitHub Actions
- Databases:** PostgreSQL, Supabase, MySQL, MongoDB, Firebase
- Testing:** Vitest, Puppeteer, Playwright, Jest, Supertest
- Integrations & Tools:** Salesforce, Twilio, Veriff, SCHUFA, Apple Wallet (PassKit), Git, Figma, Postman, Expo
- AI & Automation:** Claude Code, MCP servers, N8n Workflow Automation, Ollama (Local LLMs), OpenAI API

PROJECTS

PAYSERA TIMEKEEPING SYSTEM | 2024-2025

- Team-built corporate timekeeping system used by 40+ employees, with backend APIs in Express.js, Prisma and PostgreSQL, plus **Redis** caching.
- Implemented **E2E** and **unit testing** with Jest, Supertest and Playwright; containerized with Docker and deployed on DigitalOcean with CI/CD.

FAIR WRITE - GENDER-FAIR LANGUAGE WEB APP | 2024-2025 | THESIS PROJECT

- Text revision app suggesting inclusive, gender-fair alternatives, built on a **RESTful API** with **Python**, **FastAPI** and **spaCy** for NLP, optimized for concurrent requests.

EDUCATION

Cavite State University

BACHELOR OF SCIENCE IN COMPUTER SCIENCE

- Alliance of Computer Scientists | 4TH YEAR CHAIRPERSON
- Best Thesis (2025) | Best Game in COSC 106 (2024) | Dean's List of 5 semesters
